Business Information

NOT OPEN ON SUNDAYS. We do not have help to dig stock on Saturdays but if you want to pick up stock on Saturday let us know long enough in advance so we can have it ready for you.

THESE PRICES are in effect Fall 1957, Spring 1958.

ALL OUR STOCK is fresh dug for each order. None of it is in storage except strawberry plants.

PRICES named in this Trade List apply only to orders placed by nurserymen, florists, and dealers. Maryland customers are subject to 2% sales tax or send your License Number. All delivery costs are to be paid by purchaser.

PACKING. All goods are packed in boxes and bales for which we charge sufficient to cover cost of material used. We will add this cost to your invoice. **This cost applies whether you remit with order or buy on time terms.**

CLAIMS, if any, must be made immediately upon receipt of goods, and if just, made satisfactory, but in no case are we responsible for more than the purchase price of the stock in question. **We will not be responsible for failure to fill orders in full or for any damage or delay to stock after delivery to the transportation company.**

TERMS. We offer the usual terms: net 30 days from date of shipment to those of known responsibility **but must have satisfactory business references from others or remittance must accompany order.** Those desiring stock shipped C.O.D. will please remit **one-fourth** the amount of their purchase when ordering. Other terms by special arrangement.

NON-WARRANTY. We give no warranty, expressed or implied, the purchaser assuming all risk and responsibility of transportation, growth, planting, life of stock or any other matter on any stock we sell. We send out good stock, carefully grown and packed but cannot control conditions after it leaves our care. We exercise the greatest care to keep our stock true to name and are willing to replace on proper proof any stock that may prove otherwise, or refund the amount paid us for such stock, but it is mutually agreed that we shall not at any time be liable for any greater amount.

TELL US HOW TO SHIP, whether by express, motor truck, or railroad freight. If by motor truck or railroad freight, tell us the route or over which line you want delivery made. If you do not give this information we will use our own judgment as to route and methods to use. **It is mutually agreed that whether you name the route or leave it to our own selection, we will not in any way be responsible for time or condition of delivery and our responsibility ceases upon our delivery to the transportation company.**

HARDINESS OF PLANTS. When hardiness of plants is mentioned herein it applies to this section.

TIME OF SHIPMENT. We ship most every week in the year with the possible exception of during the winter when bad weather makes it impossible, although this is very seldom. Of course, there is a regular season for shipping, the different plants, but if you want them out of season and are willing to take the risk of good delivery, we will pack with the utmost care and get them off to you at most any time you want them.

Plan to Visit Our Nursery

We will certainly be glad to have you come to see our stock for yourself. We believe you will find it compares favorably with that grown by other nurseries. Some of our customers have told us it is better than is furnished by some others. We are on the Eastern Shore of Maryland, 100 miles south of Wilmington, Delaware, 100 miles from Kiptopeke-Norfolk, Va., ferry, 90 miles from Annapolis, Md., via Chesapeake Bay Bridge, 150 miles from Baltimore, Md., via Elkton, Md., 225 miles from New York, N. Y. We hope you can come to see our stock. It is good driving on the famous Eastern Shore.

Grafting Is Easy

You have often wanted to propagate some plants of a scarce or high priced variety but did not have the proper facilities to do it with. With a new outfit we are offering, you can do it yourself, as easily as making an old-fashioned graft. You take a branch of the shrub or tree you wish to graft (leaving it on the parent plant) girdle the branch or twig, put damp peat moss or damp sphagnum moss around the girdled part and wrap it tightly with this new waterproof plastic (in sheets) and tie it, top and bottom, with rubber bands. Generally within six to eight weeks the twig is rooted ready to pot. It requires no watering or other attention until ready to pot. Complete outfit (enough plastic sheets and rubber bands to make 100 grafts) with complete instructions how to do the grafting, for \$5.00 postpaid.

CAMELLIA JAPONICA

Until a few years ago these Camellias were not considered hardy here but the ones who were willing to take a chance with them are having good luck. If you are not colder than a little above zero, maybe you should try them also. Our sales on these are increasing rapidly.

CAMELLIA SASANQUA

We believe these are one of the best evergreen flowering shrubs at zero or maybe a little colder. They bloom from September until freezing weather. The demand for these plants is increasing about as much as for any plant we grow. Suggest you try them and treat them about as you would the Kurume Azaleas as to soil and culture.

The Rare Franklinia

A Very Unusual Flowering Tree

Each twig develops at its tip a cluster of buds of graduated size, like overgrown greenish pearls. Early in August the largest of these attain the size of marbles. Then the guard petal folds back, still retaining its firm spherical form. From this shelter emerges four other petals, satiny, snowy white, elaborately frilled and pleated. The snowy, frilly chalice, three inches in diameter, holds a sumptuous mass of orange-gold stamens and breathes forth a delicate, balmy fragrance.

Each flower lasts two or three days and then drops cleanly. There is a constant succession of blooms till hard frost. We frequently get the unusual effect of a tree clad in crimson, autumn foliage and abundantly starred with white flowers.

The Franklinia begins blooming when not more than 3 or 4 feet high. Young trees under favorable conditions increase in height a foot or more each season. Specimens 30 feet high are known. It develops naturally with several trunks, but may easily be trained to a single trunk by removing the sprouts which start from the base.

Franklinia prefers full sun, has proved entirely hardy about New York and hardy in favorable locations about Boston, Mass., and in Ohio.

HOLLY (Ilex)

For many years we have been urging nurserymen to grow more holly. Fifteen years ago there was not very much demand for holly. If you will refer to our catalogs about that time and since, you will find we said, "The nurseryman who will grow a collection of Hollies to a specimen size will have something he can sell, whether times are good or whether they are bad. There is always a demand for them, and there will be as long as any other plants will sell."

Try to buy nice holly now, see how scarce it is. We find demand increasing each season.

MALUS—FLOWERING CRABS

The Flowering Crabs are among the most charming of spring trees. They are not only beautiful when in blossom but many carry most ornamental and richly-colored fruit in the autumn. Most of the Crab family form graceful garden trees of medium size. They are quite hardy and require no particular cultivation, thriving best in a good loam and full sunshine.

* EDCO IRON

*(The Chelated Iron in This Product Is
"Sequestrene" Brand)

For experimental use in the control of chlorosis (lack of chlorophyll) in azaleas, gardenias, roses, citrus crops, etc.

Results to date have shown Edco Iron to be very effective in correcting chlorosis in the above crops. Chlorosis may be caused by the excess or deficiency of several major or minor nutrient elements in the plant besides iron, and it may be caused by an excess of water or its lack, but Edco Iron commonly seems to help correct the effect if not the cause of these several conditions.

Full directions for using with each lot.

Prices: 1 lb. \$2.30; 10 or more lbs. at \$2.00 per lb.

SPECIAL CROSSES OF RHODODENDRONS

We have several hundred plants made by a leading hybridist. If you are interested in these plants tell us and we will send a list showing varieties used in this work, sizes and prices.

We are glad we can again offer the book Rhododendrons and Azaleas by Clement G. Bowers. Has been out of print several years. 549 pages, several color plates. Price \$15.00. Contains the most information on Rhododendrons and Azaleas of any book we know of. You may send it back for a refund if you don't want to keep it. This should be published in January 1958.

This nursery was started just 52 years ago by the present owner. We have made many mistakes but we believe our customers will agree that we have always tried to give a dollar in value for every dollar received. This will be our aim as long as The Tingle Nursery Co. stays in business. If you have any reason for complaint, tell us.

TAXUS (Yew)

The Taxus are undoubtedly the most popular and useful of all the ornamental evergreens. We have been growing them extensively a good many years and the demand keeps increasing.

The English Yew (*Taxus baccata*) is not reliably hardy in the north, and many do not realize that the Japanese, and many forms of Media, are perfectly hardy in and around Boston, and the Japanese even in northern New England.

They are not so particular as to character of soil except that it should not be too wet, but they do appreciate plenty of good plant food. They are immune to many insect pests and plant diseases so destructive to many other evergreens.

The Yew in its many species and forms can well be used in most all places where any other evergreen will do well.

We honestly believe you will do well to plant and grow on some of these Yews.

Baccata (English Yew). Widely planted in English Churchyards. A good ornament. Hardy as far north as New York City. Upright, dark green foliage. Very good for the South and where it is hardy.

MORE HATFIELD YEWS

The following varieties were grown from stock purchased from the late T. D. Hatfield. He selected these as being the best of his unnamed varieties and we are still carrying them under his original numbers. We are giving brief descriptions.

Media Hatfield No. 2. Real dark foliage, upright grower; very dense; needles medium length. Very good.

8 to 10 in. trans..... \$3.50 \$30.00

Hatfield No. 6. Somewhat like No. 8 in growth but twigs are not as heavy; leaves narrow. Very graceful.

* 6 to 8 in. trans..... \$3.00 \$25.00

* 8 to 10 in. trans..... 3.50 30.00

Hatfield No. 7. Bright glossy green, heavy foliage; long needles. A low growing spreading type. Berry bearing. This one sells itself when seen.

* 6 to 8 in. trans..... \$3.00 \$25.00

* 8 to 10 in. trans..... 3.50 30.00

Hatfield No. 8. Slow growing; very compact. Foliage bright green. Resembling Cuspidata Nana. Heavy fruiting type.

* 6 to 8 in. trans..... \$3.00 \$25.00

* 8 to 10 in. trans..... 3.50 30.00

Hatfield No. 18. Similar in growth to *Taxus cuspidata*. Foliage a shade lighter making it wonderfully attractive. Probably the most rapid grower of all the low types of *Taxus*. However, it can be kept compact with a little shearing. If you want a good, quick grower, yet one having the good qualities of *Cuspidata*.

* 8 to 10 in. trans..... \$3.50 \$30.00

Hatfield No. 23. Short, fine slender foliage. Spreading type. Slow growing.

* 6 to 8 in. trans..... \$3.00 \$25.00

BLUEBERRIES

Just loads of delicious berries

There has developed an enormous demand for these plants especially for fruit. If you have not been getting some of this trade you are missing some good profits. They are easy to grow and handle.

JERSEY. The bush is of vigorous habit and grows very large. The winter color of the young growth is a light red over golden brown. The berries are among the very largest, light blue, and ripen about the same time as Rubel.

TYPEWRITER PLANT LABELS

These are in sheets of 12 labels 1/2 inch wide and 7 inches long. You can write or typewrite the labels in sheets. Easily torn apart when ready to use. 1000 for \$2.50, 5000 for \$7.75, 10,000 for \$14.50. Special prices quoted on large lots.

Azaleas

Azaleas will grow in full sun or in shade. In the sun you will have brighter colors and growth will be shorter. We prefer a little shade if convenient. The small pot-grown plants should be planted about ten or twelve inches apart in a prepared bed consisting of about equal parts of good acid soil and peat moss or rotten leaf-mold, with about one-half shade.

Azaleas like acid soil with plenty of peat moss or leaf-mold in it. As a fertilizer rotten cow manure, cotton-seed meal and tankage are good. Use this in early spring and keep well mulched with peat moss or leaf-mold and keep the plants well watered during dry weather.

Azaleas have been one of our specialties for many years. This season we are pleased to offer the largest stock we have ever grown. If you have not been getting your Azaleas—Lining-Out or Specimen—from us, we wish you would try ours this season. We aim to please you with Azaleas as well as with our other stock.

KURUME AZALEAS

The Kurume Azaleas are one of the most showy of all flowers for the garden. They are also well adapted to forcing—thousands of them being sold for Easter, Mother's Day, and Decoration Day. They are comparatively easy to grow and make such a wonderful display that the demand is constantly increasing. Many of the varieties are hardy out-of-doors as far north as Long Island. They are extremely floriferous, and in season, the blossoms completely cover the plants. The colors are almost every hue and shade except yellow, as you will find below.

1 to 5 at each rate, 5 or more at the 10 rate, 50 or more at the 100 rate, 500 or more at the thousand rate.

Items marked by an asterisk (*) are classed as Lining-Out stock.

GABLE'S HARDIER AZALEAS

Mr. Joseph B. Gable of Pennsylvania has spent almost a lifetime working with Azaleas and Rhododendrons. Many years ago he started breeding azaleas with the hopes of producing a hardier type of evergreen azalea in a good color range than then available. He has had wonderful success and is now recognized as the leader in this field.

As to hardiness: these varieties will average hardier than Hinodegiri and Amoena and much hardier than the other Kurumes. All have lived and flowered in the open field where they have withstood temperatures of twenty below zero and more in the past few winters with only negligible injury to a few. Most of them were uninjured. See article in Saturday Evening Post dated March 20, 1954.

ROSE GREELY (D3G). Mr. Gable says: "We believe we have produced in this, that hardy white we have been looking for. The color is pure except for a very faint trace of yellow in the throat, are of good size and substance and the plant of good compact, branching habit." Hose-in-hose. We are recommended this to take the place of Snow where Snow is not hardy. Rose Greely may not prove hardy in many sections but we believe it well to try it for a low growing white.

KAEMPFERI HYBRID AZALEAS

In these new Kaempferi Hybrids—the result of crossing Kaempferi and Malvatica—there has been obtained the hardiest type of evergreen Azalea, with a good range of form and color in the flowers so far achieved. Several years' tests have demonstrated that these new Hybrids are just as hardy as Kaempferi, until now the hardiest of the evergreen sorts. In connection with these Hybrids we suggest you try out the new Gable varieties we are offering.

GLENN DALE AZALEAS

We began growing these Glenn Dale Azaleas in 1941. During the past few years, since they are becoming better known, the demand has increased rapidly. Most all the reports we get from the growers are very enthusiastic. They are doing well in some sections where the evergreen varieties were not supposed to grow.

Many who have seen our fields of these Glenn Dale Azaleas in bloom expressed their amazement and joy at their size, coloring and quantity of bloom. You folks who have been dealing with us for the past many years know we do not recommend a plant unless we really believe in it. We do suggest you try some of these Glenn Dale varieties if you can grow any of the other evergreen azaleas and while you may have some disappointments we feel sure you will be greatly pleased with their growth and beauty.

These one-line descriptions do not tell you much but we do have a special booklet that describes them much more fully. Sent on request—no charge.

Sometimes when Azalea flowers are described as striped or flaked on white they will appear as a solid color. When this occurs the branch should be cut out. This seems inherent with the variety—not any fault of the nurseryman.

Capital Letters after variety name indicate sizes available in that variety, as capital B means 2 in. pot plant size, capital C means 2 yr. field beds XX trans., and so-on. We hope you will understand this system of indicating sizes as it saves a lot of space in catalog. We have been using this system for Crabapples several years and it seems to be working fine.

We will furnish one to five plants of a variety and size at each rate; five to 25 of a variety and size at the ten rate; 25 or more of a variety and size at the 100 rate.

CHUGAI AZALEAS

A new group from the Chugai Nursery Co. near Osaka, Japan. These are late flowering. Flowers are usually variegated, white or pink ground with red, lilac or purple stripes, white base with colored margin, or purple with white variegation and edge. These need more and wider trial before we can recommend planting in exposed or colder sections.

The following descriptions were furnished us by The Chugai Nursery Company.

	Each	10	100	1000

VUYKIANA AZALEAS

A new race of very large flowered Japanese Azaleas, produced by crossing hardy Azalea Malvatica hybrids with Azalea Mollis. Sturdy growers, prolific bloomers. From the information we have they are much hardier than the Kurume Azaleas. Flowers range from 2 to 2½ inches. All bloom late midseason. Plants grow tall.

HELENA VUYK. Deep carmine rose.				
* 2 in. pot plants.....		\$2.00	\$15.00	
JOHANN STRAUSS. Single, rose flowers, blotched.				
* 3 yr. field beds XX trans...		\$4.50	\$40.00	
* 4 yr. field beds XX trans...		6.00	50.00	
JOHN SEBASTIAN BACH. Purple-violet. Tall grower.				
* 3 yr. field beds XX trans...		\$4.50	\$40.00	
* 4 yr. field beds XX trans...		6.00	50.00	
PALESTRINA. We are recommending this to use in place of Ledifolia Alba for a tall growing white bloomer. Last season when Ledifolia Alba were both bud and bloom killed, Palestrina came through without any wood damage and plenty of white flowers. Try it for a hardier tall white.

* 3 yr. field beds.....		4.50	40.00	
* 4 yr. field beds.....		6.00	50.00	
GIBIYAMA. A very good purple flowered variety.				
* 2 in. pot plants.....		\$2.00	\$15.00	
* 4 yr. field beds XX trans...		6.00	50.00	
SUISHOREN. Flowers almost double. Little smaller and little darker than Hinomayo.				
* 2 in. pot plants.....		\$3.00	\$25.00	

HARDINESS OF PLANTS. When hardiness of plants is mentioned herein it applies only to this section unless otherwise mentioned.

FELDYK AZALEAS

From a famous grower in Holland. Introduced as "the Sweet Pea colored strain." They are crosses between Malvatica and Kaempferi and Japanese Azaleas. Have large bright colored flowers. Force easily, strong growers and very hardy. The blossoms exhibit all the delightful colors we most associate with Sweet Peas.

MERRITT AZALEAS

A collection of very worthwhile Azaleas produced by the late Dr. E. A. Merritt of Bethesda, Maryland. Have heard quite a bit about these Azaleas and finally secured a complete collection of them. We think they are well worth trying south of Philadelphia and possibly where the regular Kurume varieties will grow. The colors are bright and clean. Our stock plants look like they would make good forcing varieties.

We have a limited supply of most of these varieties. If you want some of them and will let us know which ones you want we will let you know what we can furnish.

Root Cuttings

with

ROOTONE

Just Dust and Plant

No Solutions No Waiting No Watching

We recommend ROOTONE because we have found it of much help to us in rooting cuttings, both in saving of time and in increased roots to the cutting. We use it on all the cuttings we plant. We know it pays us both in better roots and time saved in cutting beds.

AUNT MARY'S SWEET CORN

THE SWEET CORN SUPREME

This is the most wonderful Sweet Corn we have ever grown. One grower describes it as "the best Sweet Corn in the world."

Has the most delicious flavor and keeps a long time before becoming too hard to use. In fact, usually requires artificial heat to cure it for seed purposes.

Aunt Mary's Corn, by its excellent quality, sweetness, and flavor makes a stronger appeal to the Corn-loving public than most any other variety and that appeal continues long after you are tired of other Sweet Corns.

Liberal size packets, 35c each; 3 for \$1.00, postpaid.

If after growing this wonderful Sweet Corn you are not entirely satisfied, we will refund every cent you paid us for it.

MANUAL OF CULTIVATED TREES AND SHRUBS.

Alfred Rehder. \$12.50.

This standard reference will be welcomed by all who are interested in the cultivated trees and shrubs hardy in North America. It presents a systematic and descriptive enumeration of 2,550 species and their many varieties. Identification is facilitated by analytical keys. An exact description of each tree is given together with brief notes on its economic and ornamental properties. A glossary, complete index of author's names and a map showing zones of hardiness are also included. Map; 996 pages; 5 $\frac{7}{8}$ x 8 $\frac{3}{4}$ inches.

HOLLIES. H. Harold Hume. \$6.75.

Nurserymen and gardeners (amateur and professional) all have been waiting eagerly for a book of this sort. This is the most complete book of Hollies ever published.

In this book is the help and information as to varieties, propagation, planting, culture and orcharding of Hollies.

The many varieties of American, English, Chinese and Japanese are fully described and discussed. Many black and color illustrations.

Price \$6.75.

GROUND COVER PLANTS. Donald Wyman. \$4.75.

A guide to neat and decorative substitutes for grass. Here is the first book ever published dealing exclusively with ground covers, those low-growing plants which are used to carpet the ground in areas where grass is impractical. Full information what, where, when and how. A lot of useful information not found elsewhere.

SOIL STERILIZATION. Lawrence. \$4.25.

Covers the whole range of soil sterilization. Invaluable to nurserymen, gardeners, students and teachers.

PLANT PROPAGATION PRACTICES

A new book on propagation by James S. Wells. It is about the most practical one of its kind that we have ever seen. If you propagate plants and want to order this book we will let you return it if you do not think it worth the price of \$7.50 and we will return your remittance. Contains 344 pages, and many illustrations.

THE ARNOLD ARBORETUM GARDEN BOOK

A new book by Donald Wyman, 354 pages and priced at \$5.95. Just one plant or tree will pay for it and we will guarantee you will want to keep it. If you don't think it worth this send the book back to us and we will refund your \$5.95. We have found several single items in it worth more to us than the cost of the entire book.

PRINTING

After selling our printing department eight years ago, one of the young men (Charles L. Parker), who had been working for us, decided to start a printing business of his own. He will be very glad to quote on any work you may want done. With much pleasure I recommend him and am sure you will find him reliable in every way, and we both will appreciate any order you may place with him. Send all correspondence about printing direct to

CYTISUS BATTANDIERI

Mr. Will Ingwersen writing in the July 21, 1956 issue of Gardeners Chronicle says "There are few more beautiful shrubs in a small garden than Cytisus Battandieri. It is seldom disturbed by weather conditions, and my own specimen has emerged triumphantly from one of the worst winters I can remember for many years and is now a sheet of iridescent silver leaves, among which gleam, with all the brilliance of sunlight, great clusters of rich golden flowers. Not the least of this fine plant's many attractions is the intense fragrance of ripe fruits which the flowers exhale. It is like no other flower scent that I know."
